

# STEP LIGHT OST SYNTO

A new range of recessed wall lights designed to ensure your safety in areas that require lighting, such as corridors, stairwells and offices.

# OST STEP LIGHT

---

OST Synto light fittings are a reliable solution for dark spaces in your home.

Thanks to their advanced functionality and a wide range of accessories, OST light fittings can easily be adapted to any interior.

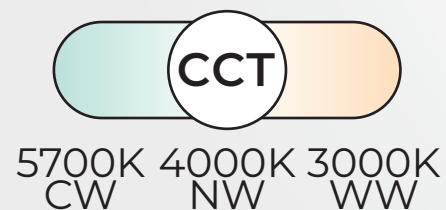

The adjustable light colour allows you to choose between three different colour settings.

# MASTER-SLAVE FUNCTION

Lighting control becomes much more convenient thanks to the Master-Slave function, which allows luminaires to be configured to operate based on master and slave units. This enables the entire passageway to be illuminated by using motion-detection points both outside and inside the illuminated route.

By installing OST-001WH-CCT-PIR-MSV models at key points along the illuminated area, with models without sensors in between, the luminaire with a motion sensor will activate all lights for 30 seconds. If the next sensor detects movement, the timer will be extended by a further 30 seconds. This allows for safe passage through the illuminated area.

OST-001WH-CCT  
OST-SSQ-BL

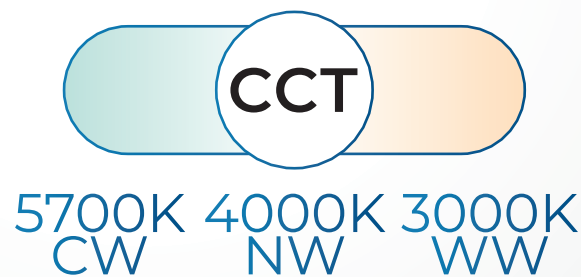

## 230V MAINS POWER SUPPLY

The luminaires do not require an additional power supply unit. They can be connected directly to the 230V mains supply. The fixture can be mounted in a standard fi60mm installation box.

## ADJUSTABLE LIGHT COLOR

OST luminaires feature the ability to change the light colour between three easily accessible settings on the front of the housing or beneath the fitted steel frame OST-RLI/RSQ or OST-SLI/SSQ, which is sold as a separate accessory.

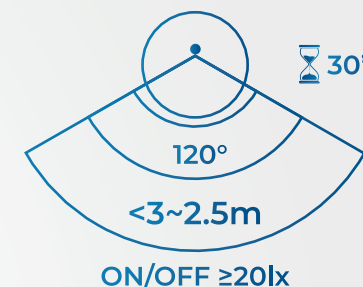

**OST-001WH-CCT-PIR**  
**OST-SSQ-WH-PIR**

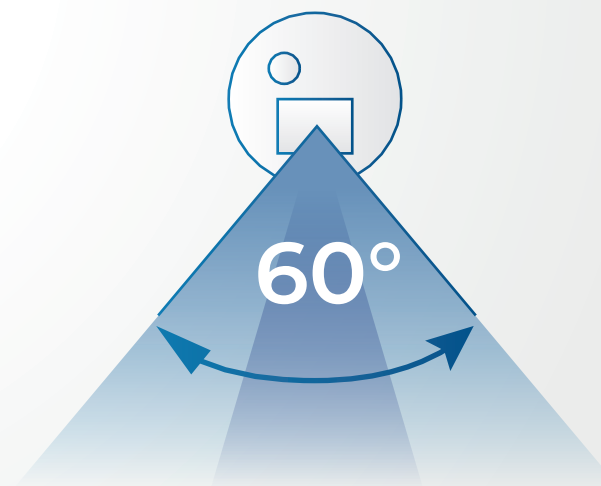

## TWILIGHT SENSOR, PIR

The motion sensor available in the OST-001WH-CCT-PIR/PIR-MSV models allows the device to be triggered within a maximum range of 3 metres across a 120° field of view.

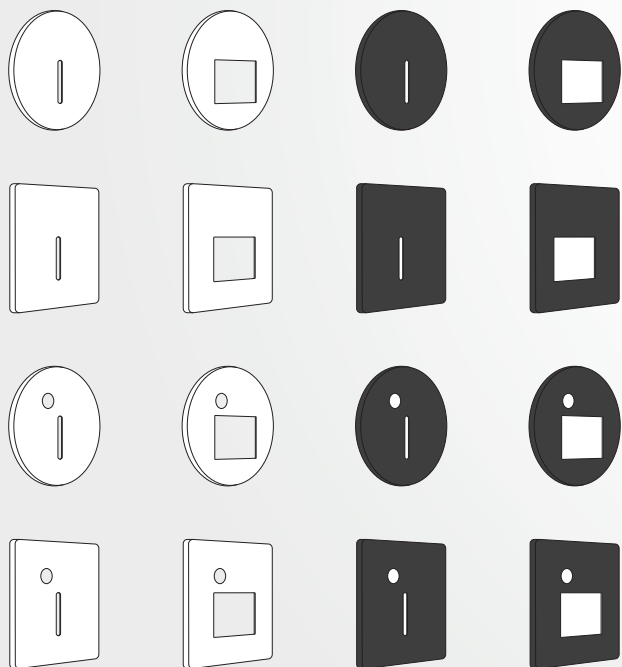

## BEAM ANGLE

The standard version of OST Synto luminaires features a 60° beam angle. Thanks to the easy-to-fit OST-RLI/RSQ and OST-SLI/SSQ accessories, you can adjust the strenght and angle of the light.

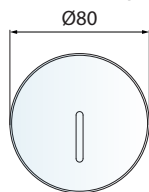

# STEEL COVER ACCESSORY

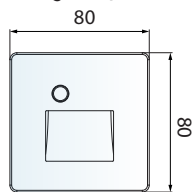

The OST-RLI/RSQ and OST-SLI/SSQ accessories are steel frames for OST Synto luminaires. They are available in various shapes (round and square), with different cut-outs (narrow and rectangular), in different colours (white and black), and with or without a cut-out for PIR/PIR-MSV models.
